## **A brand new website for Technopole Defence and Security**

**Quebec City, October 14, 2008** – Technopole Defence and Security (TDS), a non-profit nationwide business network headquartered in Quebec City bringing together key stakeholders in the defence, security and emergency preparedness sectors, is pleased to announce Technopole Defence and Security announces the on-lining of its updated website. Displaying a brand new look, the website contains a wealth of information about the defence and security market and offers several functionalities.

Having as a goal for its new website to become a reference point for its members and partners, Technopole Defence and Security has reworked its entire website so to become efficient and easy to read. Among other things, the “News”, “Industry Events” and “TDS Events” sections have been added so the users can follow up on defence and security industry current information. The website is available in English and in French, and will also give the users the opportunity to register online for TDS’ activities or events.

“This is an important step for us, explains Sonia Lebel, director Communications and administration. Technopole Defence and Security is increasing its representations outside Canada. A website being both a unique marketing tool and an extraordinary window on the world, it was clear to us that ours needed to reflect our organization’s dynamic spirit.”

That being said and since a picture is worth a thousand words, we invite you to discover our updated website at [www.technopoleds.org](http://www.technopoleds.org).

### **About Technopole Defence and Security**

Technopole Defence and Security is a non-profit organization and unique business network operating in the defence, security and emergency preparedness sectors. Capitalizing on its singular client-focused business model, TDS forms strategic partnerships leveraging its members’ expertise and resources. Bringing together research centres, universities, small businesses and integrator companies (including industry leaders such as DMR, a Fujitsu company; Thales Systems Canada, General Dynamics and CGI), TDS successfully creates synergies aimed at speeding the adoption of innovative technologies targeting the defence, security and emergency preparedness sectors.
